

In this task, you will extract the files that contain the static-website content for the Amazon S3 bucket.

Go back to SSH terminal, extract the files by running this commands:

```
[ec2-user@ip-10-200-0-14 ~]$ cd ~/sysops-activity-files
[ec2-user@ip-10-200-0-14 sysops-activity-files]$ tar xvzf static-website-v2.tar.gz
static-website/
static-website/css/
static-website/css/styles.css
static-website/images/
static-website/images/Cafe-Owners.png
static-website/images/Cake-Vitrine.png
static-website/images/Coffee-and-Pastries.png
static-website/images/Coffee-Shop.png
static-website/images/Cookies.png
static-website/images/Cup-of-Hot-Chocolate.png
static-website/images/Strawberry-&-Blueberry-Tarts.png
static-website/images/Strawberry-Tarts.png
static-website/index.html
[ec2-user@ip-10-200-0-14 sysops-activity-files]$ cd static-website
[ec2-user@ip-10-200-0-14 static-website]$ ls
css  images  index.html
```

If you see the files, they have been successfully extracted

End of Task 6!
