

In the SSH terminal window:

```
[ec2-user@ip-10-200-0-14 static-website]$ cd ~
[ec2-user@ip-10-200-0-14 ~]$ touch update-website.sh
[ec2-user@ip-10-200-0-14 ~]$ vi update-website.sh
[ec2-user@ip-10-200-0-14 ~]$ cat update-website.sh
#!/bin/bash
aws s3 cp /home/ec2-user/sysops-activity-files/static-website/ s3://maayanaimelak345/ --recursive --acl public-read
[ec2-user@ip-10-200-0-14 ~]$ chmod +x update-website.sh
```

And then you make the file an executable batch file.

```
#!/bin/bash
aws s3 cp /home/ec2-user/sysops-activity-files/static-website/ s3://maayanaimealak345/ --recursive --acl public-read
```

```
[ec2-user@ip-10-200-0-14 ~]$ vi sysops-activity-files/static-website/index.html
[ec2-user@ip-10-200-0-14 ~]$ ./update-website.sh
upload: sysops-activity-files/static-website/css/styles.css to s3://maayanaimelak345/css/styles.css
upload: sysops-activity-files/static-website/index.html to s3://maayanaimelak345/index.html
upload: sysops-activity-files/static-website/images/Coffee-Shop.png to s3://maayanaimelak345/images/Coffee-Shop.png

[ec2-user@ip-10-200-0-14 ~]$
```

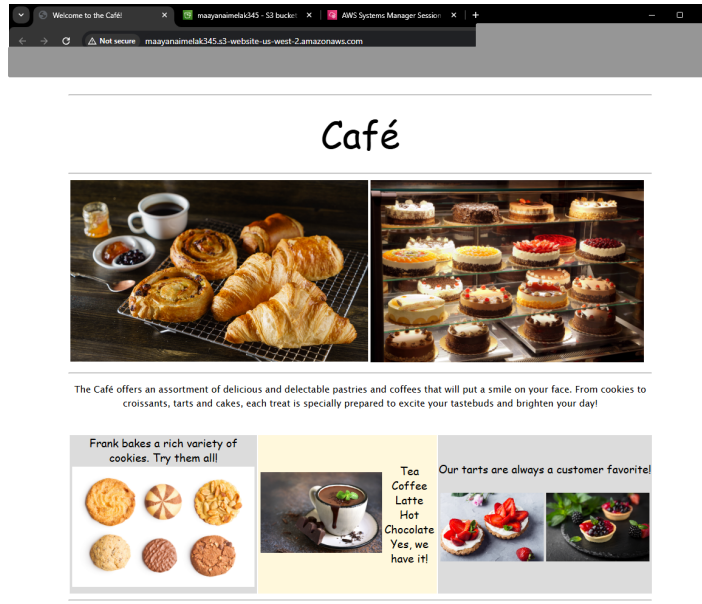

You will edit the colors to this:

```

<tr>
  <td colspan="2">
    <div id="cookies">
      <div id="cookiesText">Frank bakes a rich variety of cookies. Try them all!</div>
      <table>
        <tr>
          <td>
            </td>
          </tr>
        </table>
      </td>
    </tr>
    <tr>
      <td colspan="2">
        <div id="tarts">
          <div id="tartsText">Our tarts are always a customer favorite!</div>
          <table>
            <tr>
              <td>
                </td>
              <td>
                
              </td>
            </tr>
          </table>
        </div>
      </td>
    </tr>
  </tr>
</table>

```

Return to the web browser and refresh it:

And you will see the changes.

End of Task 8!

@MaayanAimelak
